SCT Limited

User Guide for EB 1304 MPEG4+

PC Spec Required

- ➢ Windows 2000 / XP
- ➢ P4 2.4GHZ (or above) Processor
- ➢ DDR 256MB RAM (or above)
- ➢ USB 2.0 Port

Backing Up

- o Install the USB Playback Application and Adobe Acrobat Reader (to view manual) from the AverMedia cd provided with the DVR.
- o Turn Your DVR on (unit must NOT be recording)
- o Connect your PC to the DVR via the USB lead supplied.
- o Your DVR will now say;
  USB Backup – Yes (select) / No (menu)
- o Press 'select' on your remote and your DVR will display the message 'USB Processing'.
- o Go to your PC and select 'HDD Backup'.
- o When the application opens up, click on the 'Browse' button in line with 'Target Path'. A box will appear allowing you to either select and existing folder or make a new folder for where you would like the backup to be saved.
- o When you have selected your target path, click on the browse button in the line with 'Source Disk'.
- o You will now have a box infront of you displaying a list of drives you can back up from. Click on the drive to highlight it and then click 'OK'.
- o You will now see a log off recordings on the left and a display box on the right. To select the recording with the time/date you require simply tick the box in the 'No.' column for that recording . Click on the 'Start' button (bottom right) and wait for your backup to complete.
- o When finished, a box will pop up saying 'Backup Complete', simply click 'OK' then close/minimize the window.
- o Go back to your AverMedia install cd (Re-insert if cd removed) and click on 'Qlog Viewer'. When this has opened click on the icon that has a film strip with a folder infront of it (above print icon).
- o When a box appears go to the folder you backed up to, and select the file you want to edit/cut down/prep for burn.
- o The backup will now appear in the Qlog Viewer.

o Play/Scroll through the recording to the start of the incident you want, then click on the segment button (upside down triangle's – next to scissors)
o Scroll through to the end of the incident and click the segment button again. The area that you have chosen will be highlighted in blue.
o Click 'Cut' (scissors button) and select where you would like to save the extract. When you click save it 'file converting' and when finished will say 'file exporting complete'.
o To view the file you will need to go to where you saved the file and view it through your dvd viewing media (e.g Power DVD).
