

## **User Guide - EB 1504 MPEG4**

### **PC Spec Required**

- Windows 2000 / XP
- P4 2.4GHZ (or above) Processor
- DDR 256MB RAM (or above)
- USB 2.0 Port

### **Backing Up**

- Install the USB Playback Application and Adobe Acrobat Reader (to view manual) from the AverMedia cd provided with the DVR.
- Turn Your DVR on (unit must NOT be recording)
- Connect your PC to the DVR via the USB lead supplied.
- Your DVR will now say;  
USB Backup – Yes (select) / No (menu)
- Press 'select' on your remote and your DVR will display the message 'USB Processing'.
- Go to your PC and select 'HDD Backup'.
- When the application opens up, click on the 'Browse' button in line with 'Target Path'. A box will appear allowing you to either select an existing folder or make a new folder for where you would like the backup to be saved.
- When you have selected your target path, click on the browse button in the line with 'Source Disk'.
- You will now have a box in front of you displaying a list of drives you can back up from. Click on the drive to highlight it and then click 'OK'.
- You will now see a log of recordings on the left and a display box on the right. To select the recording with the time/date you require simply tick the box in the 'No.' column for that recording. Click on the 'Start' button (bottom right) and wait for your backup to complete.
- When finished, a box will pop up saying 'Backup Complete', simply click 'OK' then close/minimize the window.
- Go back to your AverMedia install cd (Re-insert if cd removed) and click on 'Qlog Viewer'. When this has opened click on the icon that has a film strip with a folder in front of it (above print icon).
- When a box appears go to the folder you backed up to, and select the file you want to edit/cut down/prepare for burn.
- The backup will now appear in the Qlog Viewer.

- Play/Scroll through the recording to the start of the incident you want, then click on the segment button ( upside down triangle's – next to scissors)
- Scroll through to the end of the incident and click the segment button again. The area that you have chosen will be highlighted in blue.
- Click 'Cut' (scissors button) and select where you would like to save the extract. When you click save it 'file converting' and when finished will say 'file exporting complete'.
- To view the file you will need to go to where you saved the file and view it through your dvd viewing media (e.g Power DVD).
